NC POST DILATATION CATHETER

## Guaranteed accuracy under high pressure

- Crossability with accuracy during post-dilatation
- Excellent Trackability and highest balloon resistance
- PTFE hypotube designed to offer outstanding Pushability and kink resistance
- Controlled compliance and limited growth
- Low Balloon profile
- Excellent stent recrossing
- Excellent deflation time average less than 10 Seconds
- Unsurpassed durability when inflated several times at 20 atm.
- Superior deliverability

**Non Compliant  
Balloon Catheter**
